

This meeting consisted of an educational program presented by Nelson Linkous WZ8E entitled, "RF triangulation and Fox Hunting." It was interesting and we all learned a lot. Thanks so much to Nelson for his knowledge and expertise. He and others hand carried a lot of equipment up 5 floors as the elevator was down. He used Google Earth, hard copy maps, three different antennas, a handheld with S meter, compass, and signal generator for his presentation. We sincerely appreciate his efforts.

His video presentation can be found on the ERARC Facebook site. The sound is low but understandable. The videographer is new at this. Please forgive.
